## Features

First, you need to add array place helper script to the game object that need to be added with array.

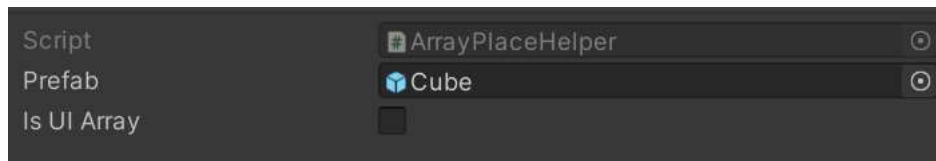

After the script is successfully added, you will see the following array place component.

Array Place Helper Panel Overview

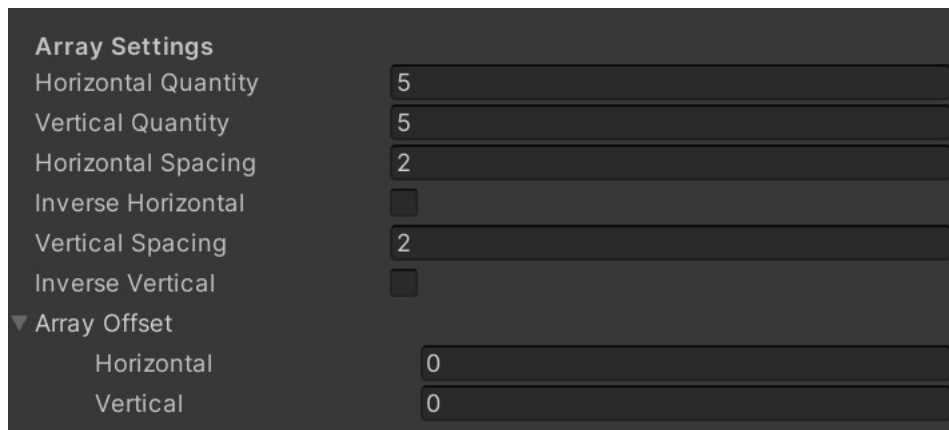

The panel is divided into four parts: basic settings, array settings, random settings

and exclusion settings.

Base setting

- ◆ Prefab - A prefab that needed to generate the array. Cannot be an gameobject in the scene.
- ◆ Is UI Array - Check this if the prefab is a UI component.

Array Settings

- ◆ Horizontal Quantity- Quantity to be placed horizontally.
- ◆ Vertical Quantity- Quantity to be placed vertical.
- ◆ Horizontal Spacing - Spacing of horizontally placed objects.
- ◆ Inverse Horizontal - Reverse the horizontal placement direction.
- ◆ Vertical Spacing - Spacing of vertical placed objects.
- ◆ Inverse Vertical - Reverse the vertical placement direction.
- ◆ Array Offset - Position offset of the array in horizontal and vertical directions.

**Random**

▼ Random Offset
